KLEUR EN MATERIAALGEBRUIK

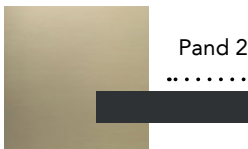

diversiteit per pand

- baksteen halfsteensverband
- blauwe metselwerk ornament
- negge 80mm
- spijlen hekwerk

Pand 3

- alumium felsplaat
- plint - natuursteen
- negge 70mm t.o.v. vlakke delen
- balkon voorzijde vv staalplaat met perforaties

Pand 2c

- baksteen halfsteensverband (waalformaat)
- baksteen koppen in tegelverband (penanten met dieptesprong)
- negge 80mm
- lamallen hekwerk

Pand 2b

- baksteen halfsteensverband (waalformaat) en baksteen wildverband stootvoegloos in horizontale banden
- negge 80mm
- glazen balustrade

Pand 2a

- baksteen wildverband (hilversums formaat)
- aluminium kaders
- negge 190mm
- glazen balustrade

Pand 1b

- baksteen wildverband stootvoegloos (waalformaat)
- plint - natuursteen en aluminium beplating
- negge 330mm
- glazen balustrade met aluminium en natuursteen

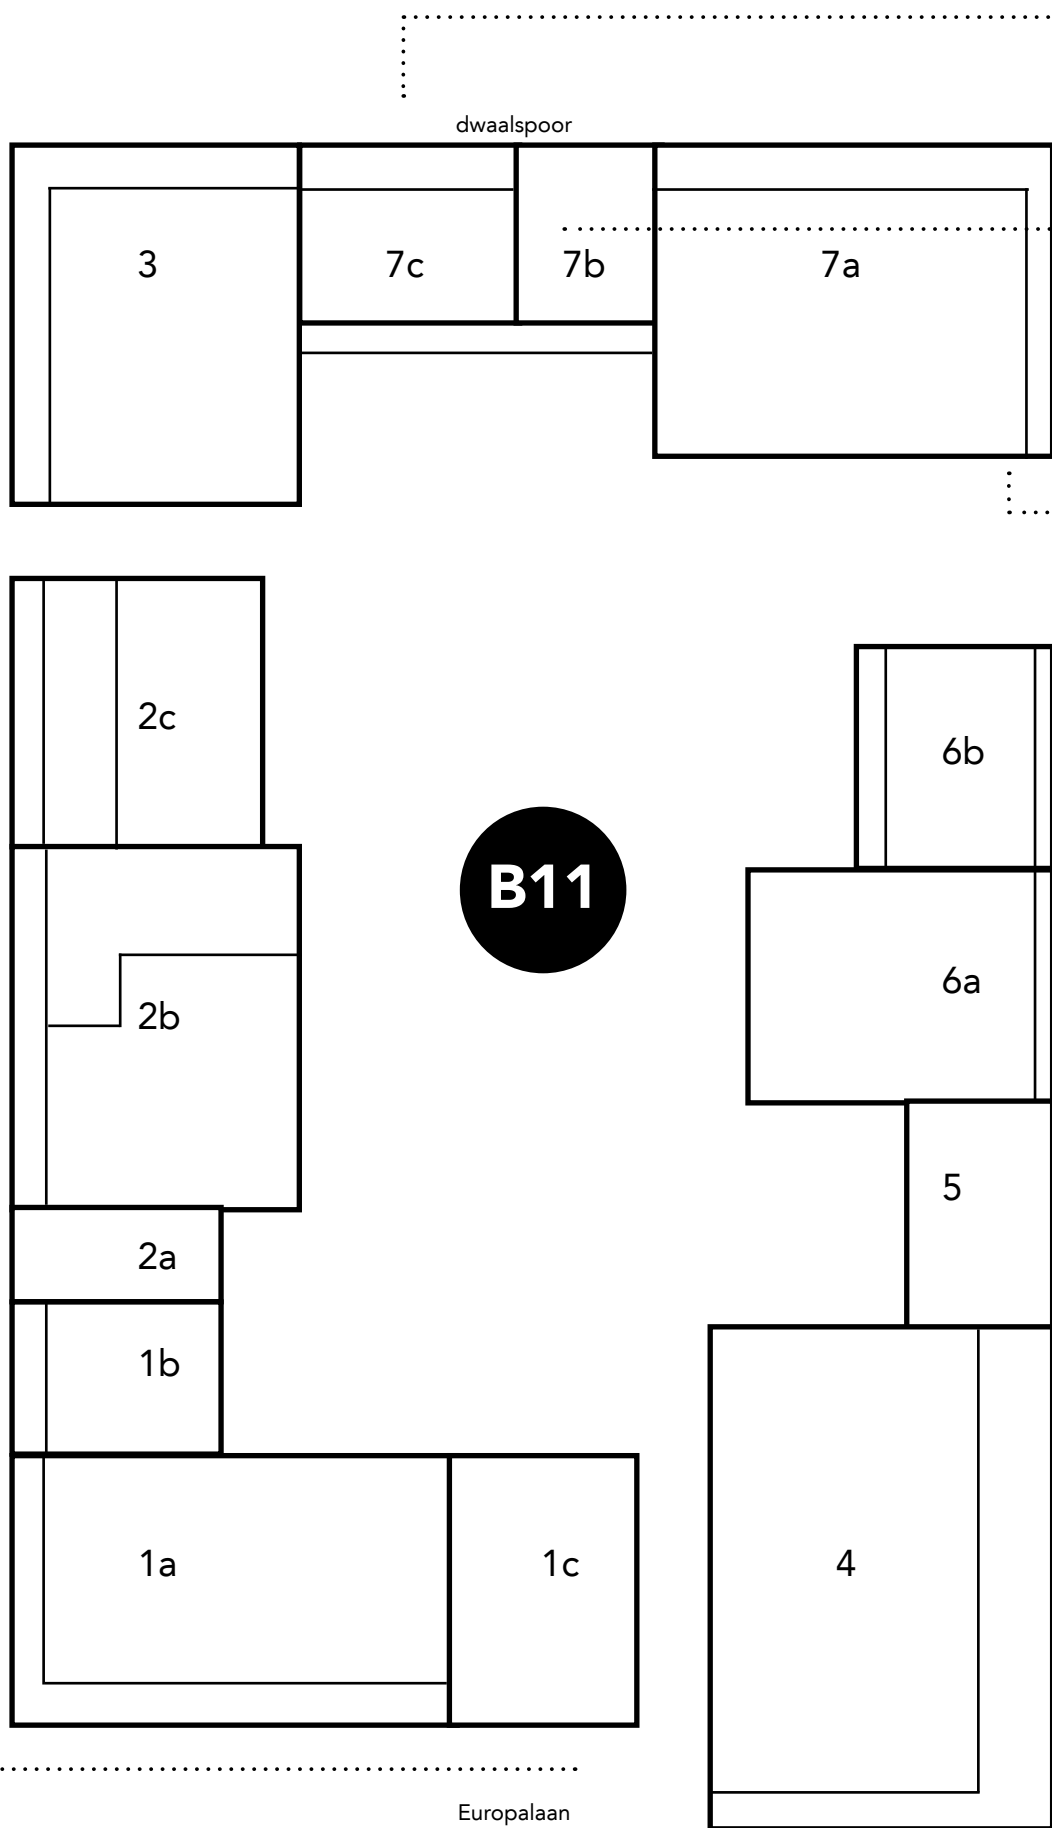

Pand 1a

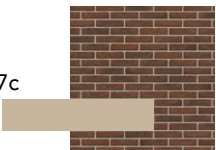

- profiel plaat
- plint - stucwerk
- negge 330mm

Pand 4

- baksteen halfsteensverband (waalformaat) + uitstekende baksteen
- negge 80mm/180 mm
- lamellen hekwerk

- hout panelen
- vezelcement
- plint - baksteen halfsteensverband (waalformaat)
- negge metselwerk 190mm
- houten balustrade met latten

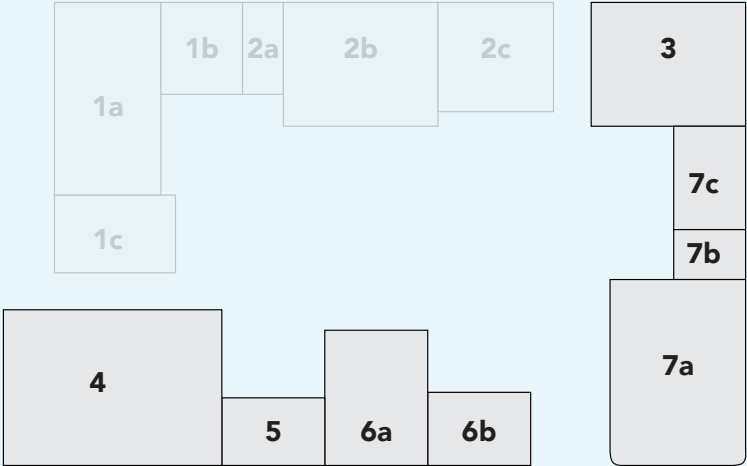

- baksteen wildverband (hilversumsformaat), en baksteen halfsteensverband (waalformaat)
- holonite horizontale band
- negge 80mm t.o.v. terugliggend metselwerk vlakken
- lamellen hekwerk

- baksteen wildverband (hilversumsformaat)
- negge 80mm (plint 190mm)
- gelaagd glas balustrade

- baksteen halfsteensverband
- aluminium zetwerk rond kozijnen
- negge 80mm
- spijlenhekwerk

- verkoold hout - Shou Sugi Ban
- negge 330mm

- steenachtig onder setback
- plaatmateriaal boven setback
- horizontale belijning
- negge 70mm t.o.v. tussengelegen penanten
- bovenste deel glazen balustrade

referenties gevelgeleding

Van de grootste afstand vallen de horizontale belijning en de wisselende balkons op.

Enige verbijzondering in het torendeel is de subtiële beëindiging van de verticale lisenen.

Dichterbij wordt ook duidelijk dat plint en toren anders zijn gematerialiseerd.

Van veraf lijkt het grote ronde raam een incident; deze adresseert de stadsnis.

Subtiële wisselingen in de materialisatie worden dichtbij duidelijker.

In de onderste bouwlaag ontwaardt er een spel van kleur en materiaal; met als climax de hoofdentree van het gebouw.

schaal, ornament

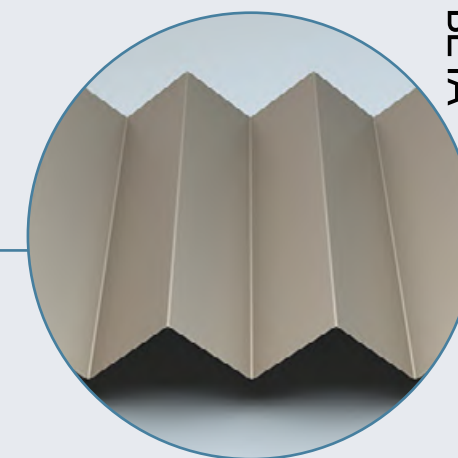

verticale lisenen

Aluminium zetwerk 150 x 250 (ca.), met (soms) opgenomen HWA balkons. Aluminium gepoedercoat met structuurlak n.t.b.

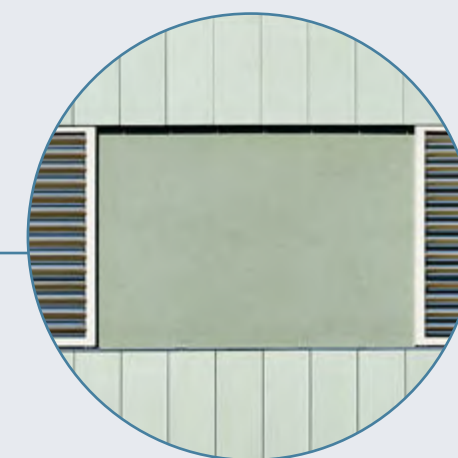

banden plintniveaus

geprefabriceerd beton met bredere, diepere profilering

horizontale banden 'gesloten'

Aluminium golfplaat MCS
MN Metall Z50-120NW,
gepoedercoat met structuurlak n.t.b.

horizontale banden 'open'

Aluminium kozijnen, gepoedercoat met structuurlak n.t.b.
